

NZ climate policy: need for a strategic approach

Guy Salmon

Wise Response meeting

27 January 2016

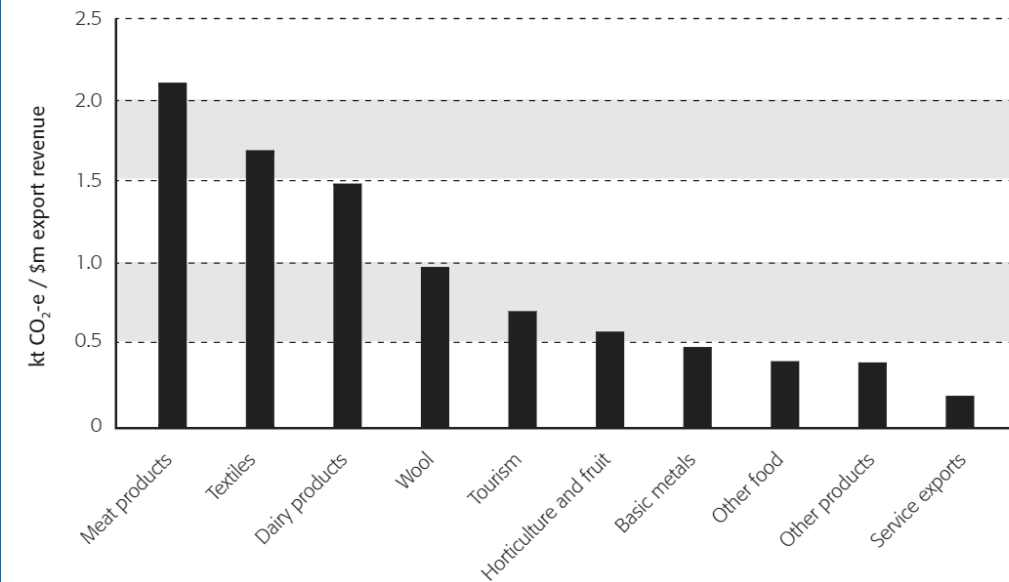

PATHWAYS TO SUSTAINABILITY

NZ as a petro-state

Figure 2. Emissions Intensity by Industry

Tonnes of GHG gas emission (1000s) per \$1 million of export revenue

- ❖ Export livelihood earned mainly from GHG-intensive products
- ❖ Climate policy does not focus on transforming the economy away from this dependence.

Three strategies

1. **Least cost – ETS
but include
agriculture**
2. **Strategic approach
by sector**
 - ❖ **Diversify from
livestock**
 - ❖ **New city design &
infrastructure**
 - ❖ **Freight transport**
3. **Personal change**
